PASSWORD BUSTERS!

Passwords have been haunting us for far too long. We know they leave us exposed to cyberthreats. We know they're expensive for IT to maintain and troubleshoot. We know they give employees a major headache trying to remember them all. So why won't they leave us alone? And how do we get rid of them for good?

Tell-tale signs you're haunted by passwords

You're spending too much money on them

The average company spends **$1 million on password management** and re-sets a year

Your employees can never remember them

25% of employees forget at least one of their passwords a day

You help desk deals with them non-stop

Password related issues take up over **40% of IT's time**

They're letting hackers into your system

99% of hacks could be prevented if businesses used MFA instead

So.... Who you gonna call?

Deploy and manage passwordless credentials all in one platform
- YubiKeys, Windows Hello for Business, hardware token, mobile authenticators, etc. can all be managed in Axiad Cloud, reducing the time spent by IT and end users on authentication issues

Implement cloud-based PKI as a Service for your users, machines, and devices
- Offer the highest level of security with simple and scalable Axiad PKI certificates for your workforce and your additional use cases

Enforce better user security behavior
- No more procrastinating on issuing credentials or renewing – Axiad Airlock sends your employees straight to their self-service portal as soon as they need to update their authentication

Say goodbye to password-based emergency access
- Employee lockouts are inevitable, but no longer require a one-time password for them to regain access – Axiad MyCircle allows them to verify their identity in a face-to-face interaction with a trusted colleague

Ready to send your passwords back to the grave?

Get in touch with our password busting team at Axiad and find out just how simple your passwordless journey can be.
